

# AO000405

## Objective • Entocentric

accessories optical, Lens Entocentric, Ø42mm 44long, F1.6/4.2mm, Minimum distance 200mm, C-mount (1-32 UN 2A), Up to 1.2 megapixel, Focal distance Fixed

Entocentric lenses have a fixed or variable (zoom lenses) opening angle of the optics to the object. They are used for presence detection and assembly control, pick and place applications, feature inspections, color applications, OCR-recognition and code reading. Due to their perspective error they are not suitable for measurement applications. Telecentric lenses are special optical lenses that are characterized by the fact that their entrance or exit pupil are located at infinity. They are mainly used for measurement tasks with high repeatability, especially when measuring is to be made without perspective distortion at fluctuating object positions (in excess of the field of view in x and y direction).

### Mechanical features

Lens diameter	42
Length	43.5 mm
With C-mount thread	Yes
Lens connection	C-mount (1-32 UN 2A)
Ambient temperature	-20 - 50 °C

### Optical features

Resolution capacity	Up to 1.2 megapixel
Aperture number	1.6
Focal distance range	4,2 mm
Lens type	Entocentric
Minimum focal distance	200 mm
Aperture range	4,2

### Other features

Aperture control	Manual
Focusable	No

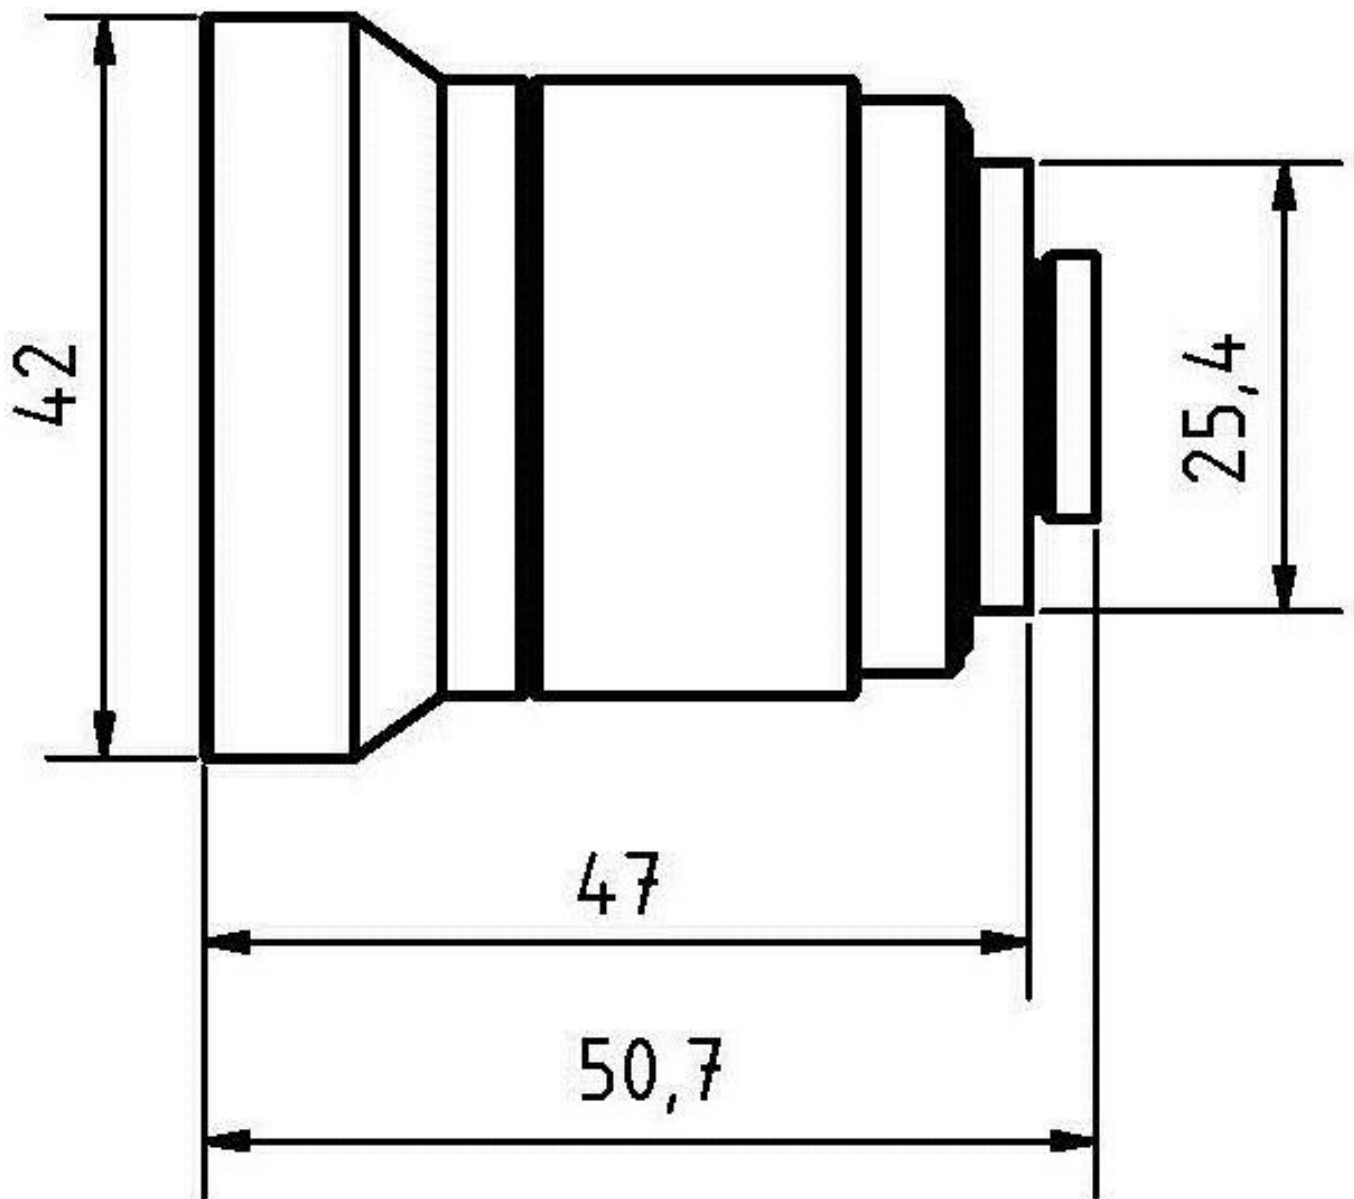

### Classification

ETIM 8	EC001776 Lens for surveillance camera
--------	---------------------------------------

**More**

IPF Product Group	914 accessories camera sensors
packaging dimensions	160 x 99 x 60 mm
gross weight	180 g
Customs tariff number	90021100
WEEE number	40951076
OzDS-compliant	Yes
POP-compliant	Yes
Reach-compliant	Yes
RoHS-compliant	Yes

**Dimensional drawing**

**Installation**

Mounting / installation may only be carried out by a qualified electrician!

**Disposal**

WEEE number according to § 6 para. 3  
ElektroG: 40951076

**Safety warnings**

- / Before initial operation, please make sure to follow all safety instructions that may be provided in the product information.
- / Never use these devices in applications where the safety of a person depends on their functionality.
