

AY000033

stop tappet • Stop tappets

Accessories Sensor, limit stop, M8x1 41long, steel, plunger

including Nut

The stop tappet system is ideal when contactless inquiry is not possible or can be prevented. The movement absorbed via the actuating element is guided through the housing via a shaft and pushes out a metal surface on the other side, which can be detected by an inductive sensor. This enables fully electronic inquiry without the risk of damaging the sensor.

The actuating element is returned via a spring and a stroke limiter prevents contact with the sensor. The complete system includes a suitable holder as a connecting piece to a separate sensor.

The 41mm long AY000033 made of hardened steel can withstand an actuating force of 1000N. An M8x1mm thread is cut into the housing for fastening.

Electrical features

Absolute repeat accuracy	0.01 mm
--------------------------	---------

Mechanical features

Thread length	25 mm
Thread pitch	1 mm
Length	41 mm
Wrench size	10 mm
Housing material	Steel
Max. limit stop energy	1000.00 N
Limit stop stroke	1.00 mm
Operating force	3,00 N
Thread dimension	M8

Other features

Features	hardened Hardened (>60HRC)
----------	----------------------------

Classification

ETIM 8	EC002024 Accessories/spare parts for command devices
--------	--

More

IPF Product Group	900 accessories
packaging dimensions	120 x 100 x 12 mm
gross weight	16 g
Customs tariff number	73181900
WEEE number	40951076
Reach-compliant	Yes
RoHS-compliant	Yes
