

AY000065

stop tappet • Holders for stop tappets

Accessories Sensor, holder, Ø6.5mm, stainl. steel

The stop tappet system is ideal when contactless inquiry is not possible or can be prevented. The movement absorbed via the actuating element is guided through the housing via a shaft and pushes out a metal surface on the other side, which can be detected by an inductive sensor. This enables fully electronic inquiry without the risk of damaging the sensor.

This holder serves as a connecting piece between the plunger and the sensor in this system. It is compatible with a whole range of plungers and sensors.

Made from stainless steel, the AY000065 is suitable for flush-mounted inductive sensors of the Ix06 design.

Mechanical features

Design	Straight
Length	25 mm
Wrench size	12 mm
Material	Stainless steel

Other features

Suitable for	Design Ix06 - flush
--------------	---------------------

Classification

ETIM 8	EC002024 Accessories/spare parts for command devices
--------	--
