Flyer cylinder sensors en

Cylinder sensors the reliable way to determine position

In many automated applications, there is hardly any way around pneumatic cylinders, e.g. in injection molds and in drive, conveyor or handling technology. In these and many other areas of application, it is often necessary to receive a switching signal at certain piston positions. Our cylinder sensors, which inquire the position of piston rods in pneumatic cylinders in a contactless, wear-free and therefore very reliable manner, are recommended for this purpose.

Classification

ETIM 8

More

IPF Product Group	006 Print media
packaging dimensions	297 x 210 x 3.6 mm
gross weight	156 g
Customs tariff number	49111090
WEEE number	40951076
Reach-compliant	Yes
RoHS-compliant	Yes

Installation

Mounting / installation may only be carried out by a qualified electrician!

Disposal

WEEE number according to § 6 para. 3 ElektroG: 40951076

Safety warnings

/ Before initial operation, please make sure to follow all safety instructions that may be provided in the product information.

/ Never use these devices in applications where the safety of a person depends on their functionality.
