Flyer fluid technology en

Fluid technology is a generic term for all processes used to measure the status (pressure, temperature, filling level, flow, etc.) of gases and liquids.

Everything is in flow? That's how it should be! And so that you can measure the status of gases and liquids both accurately and reliably, you need a solution that is ideally suited to your application - no matter how demanding it may be.

A solution that you are sure to find at ipf electronic, because we have a very extensive range of sensors that cover the entire field of fluid technology. See for yourself!

And if you still can't find your solution in this brochure or don't know exactly which device is suitable for your specific application, then simply ask us. We will be happy to help you!

### Classification

ETIM 8

### More

IPF Product Group	006 Print media
packaging dimensions	297 x 210 x 4.1 mm
gross weight	208 g
Customs tariff number	49111090
WEEE number	40951076
Reach-compliant	Yes
RoHS-compliant	Yes

#### Installation

Mounting / installation may only be carried out by a qualified electrician!

#### Disposal

WEEE number according to § 6 para. 3 ElektroG: 40951076

### Safety warnings

/ Before initial operation, please make sure to follow all safety instructions that may be provided in the product information.

/ Never use these devices in applications where the safety of a person depends on their functionality.
