Flyer high-power light barriers en

A clear view despite dirt, dust, moisture and more

When high requirements have to be met and special challenges overcome, special and extremely reliable solutions are required - such as our high-performance light barriers. High-performance light barriers are optical sensors and are one-way systems that consist of a transmitter, receiver and amplifier as a three-part solution.

This constellation in combination with infrared light, which penetrates almost everything, gives our high-performance light barriers unique properties. They therefore certainly occupy a special position in the field of optical sensors.

The different transmitter/receiver systems, in combination with various amplifiers, are particularly suitable for use in environments with extremely harsh environmental conditions, which are often accompanied by high levels of dirt and dust. But these light barriers can do much more!

Classification

ETIM 8

More

IPF Product Group	006 Print media
packaging dimensions	297 x 210 x 3.1 mm
gross weight	104 g
Customs tariff number	49111090
WEEE number	40951076
Reach-compliant	Yes
RoHS-compliant	Yes

Installation

Mounting / installation may only be carried out by a qualified electrician!

Disposal

WEEE number according to § 6 para. 3 ElektroG: 40951076

Safety warnings

/ Before initial operation, please make sure to follow all safety instructions that may be provided in the product information.

/ Never use these devices in applications where the safety of a person depends on their functionality.
