Flyer LED signal lights en

Clear and with great effect

What works with traffic lights in road traffic also works in industry, albeit often far more complex. LED signal lights indicate machine, system or process statuses and thus visually transmit very specific information, sometimes flanked by an acoustic signal.

But the familiar, classic signal lights are not always required. Of course, ipf electronic also has these in its product range, but also a number of other designs and rather unusual designs that ensure optimum signal transducer in all conceivable applications and are individually adapted to the respective situation and customer specifications.

Whether compact and round, particularly flat, rather short or elongated, freely configurable, with touch function, as a strip light, with or without signal transducer, etc., we have the right LED signal light with great effect for almost all tasks, installation situations and environments.

And if you still haven't found the right light for your own application after looking through this brochure, then give us a call, because what you will find here is partly the result of very individual customer requests.

Classification

ETIM 8

More

IPF Product Group	006 Print media
packaging dimensions	297 x 210 x 3.1 mm
gross weight	104 g
Customs tariff number	49111090
WEEE number	40951076
Reach-compliant	Yes
RoHS-compliant	Yes

Installation

Mounting / installation may only be carried out by a qualified electrician!

Disposal

WEEE number according to § 6 para. 3 ElektroG: 40951076

Safety warnings

- / Before initial operation, please make sure to follow all safety instructions that may be provided in the product information.
- / Never use these devices in applications where the safety of a person depends on their functionality.
