Inductive sensors • Increased ambient temperature

Sensor inductive, M50x1.5 64long, non-flush, Sn: 25, 0-230°C, connection to amplifier, M12 cable connector 5m PTFE, IP50, VA

including Nut

Inductive proximity switches are contactless sensors. They detect all conductive metals, regardless of whether they are moving or not. The switching distance that the devices can achieve depends on the object material and its dimensions. The vibration-resistant sensors can be approached laterally or from the front. Inductive proximity switches are used for presence detection (e.g. goods carriers), positioning (e.g. oven flaps), counting (e.g. nuts / screws), speed detection (e.g. on gear wheels), on conveyor systems (e.g. hose feeds) or distance measurement (e.g. press-fit inspection) of metallic objects.
